YOUR DATA. YOUR DECISION.

3 prompts against data brokers

DELETE

Find where your data is listed. Request deletion. Make the process easier with AI – while staying in control yourself.

IN THREE STEPS

Who shows my data? And how do I get rid of it?

People-search sites and data brokers collect names, addresses, phone numbers and connections to other people. Under data protection laws such as the GDPR (EU/UK) or the CCPA (California) you have the right to know what data is stored about you and to request its deletion.

01 **Find**
ChatGPT searches for sites that might publish information about you.

02 **Request deletion**
For every matching site you get an individual deletion request.

03 **Simplify**
If your browser tool supports it, AI helps fill in the forms. You check and submit.

> **Important:** Use a chat with web search for this (e.g. ChatGPT with “Search”). Only enter data that can already be found publicly about you. Check every result yourself before you act. This guide is not legal advice.

FIND

Where is my data?

01

Let ChatGPT search for people-search sites and data brokers that might publish information about you.

PROMPT TO COPY

PROMPT 1 · SEARCH

"You are an expert in data protection and online research. Search the web for people-search sites, address and phone directories and data brokers that might publish information about the following person:

Name: **[first and last name]** · City/region: **[place]** · Country: **[country]** · Known online profiles: **[e.g. LinkedIn, website]**

Give me a table with: Website | What is shown there (e.g. address, phone number, age, linked people) | Link to the listing | Link to the opt-out or deletion form or privacy contact | How confident the match is to me (high/medium/low).

Only list sites you actually found. Don't make up results and mark anything uncertain."

Hanna's tip

"Open every link yourself. Not everyone with your name is you."

REQUEST DELETION

One request per website.

02

Your list of results becomes an individual, factual request for access and deletion for every site.

PROMPT TO COPY

PROMPT 2 · DELETION REQUEST

“For each of the following websites, write an individual request to delete my personal data and to give me access to the data stored about me, based on the data protection law that applies to me (**[e.g. GDPR Art. 17 and 15 / UK GDPR / CCPA]**): **[paste table from prompt 1]**.

My details: **[name, email for the reply]**. In every request, name the exact listing (link) and which data is visible there. Ask for confirmation of the deletion within the legal deadline (under the GDPR: one month) and ask them to pass the request on to any recipients so they delete the data too.

Tone: factual, polite, firm. Format every request as an email with a subject line. Don’t add any data I haven’t given you.”

Hanna’s tip

“Only give as much data as the site needs to identify you. No ID, no extra information.”

SIMPLIFY

AI assists. You decide.

03

Some browser tools with an AI agent can prepare forms for you. Only use this if your tool supports it, and approve every page yourself.

PROMPT TO COPY

PROMPT 3 · BROWSER AGENT

"Open the opt-out or deletion forms from this list one by one: **[links from prompt 1]**.

Fill in each form with these details: **[name, email, link to the listing]**. If a form allows free text, use the matching request from prompt 2.

Stop before every submission and show me what you entered. Don't send anything without my approval. Never enter payment details, passwords or ID documents. If a CAPTCHA, a login or an identity check appears, stop and let me know.

At the end, keep a list: Website | Form filled in | Submitted (yes/no) | Date."

Hanna's tip

"Set a reminder for four weeks from now and check whether the listings are really gone."

SEARCH LESS. ACT SMARTER.

More control, *less manual work.*

AI takes the busywork off your plate. The decision about what happens with your data stays with you.

If you want to know where else AI can save you time in your business, talk to me.
